

## OESC Partners with Concept Interactive Inc.

Ontario Education Services Corporation (OESC) is pleased to announce they have partnered with [Concept Interactive Inc.](#), one of Canada's leaders in Enterprise Portal development. Their new [schoolBundle Inc.](#) offering is a state-of-the-art school and portal system which provides a comprehensive suite of services that meets the needs and enhances community engagement of students, parents, teachers, support staff and school boards at a fraction of the cost of other portal based systems. Ontario School Boards will save approximately 75 to 80% of the cost by deploying the schoolBundle system, as opposed to issuing their own RFP. The schoolBundle system offers a true customized, turn-key portal for your Board, with available financing options with minimal IT staff requirement.

Built in Ontario for Ontario School Boards, the schoolBundle portal system is currently being deployed and enhanced in selected Ontario School Boards. It provides many time and cost saving innovations, communications and administrative tools such as:

- Board Intranet
- Board Internet
- Budget Planning
- Class Sites
- Employee Self Service
- Management Self Service
- Staff/Teacher/Student My Sites
- Individual Education Plans
- Offence Declarations
- Parent/Guardian sites
- Performance Appraisal
- Procedures/Forms for Admin
- School Internet Sites
- Student Assessment

Boards that contract with the joint venture will not have to issue a separate RFP to acquire this system. For a personal demonstration of the schoolBundle, please contact Bob Williams at [bwilliams@oesc-cseo.org](mailto:bwilliams@oesc-cseo.org) or phone: 647-407-6229.
